Cohen & Steers Infrastructure Fund

The primary investment objective of the Fund is to seek high current income through investment in securities issued by infrastructure companies. Infrastructure companies typically provide the physical framework that society requires to function on a daily basis and are defined as utilities, pipelines, toll roads, airports, railroads, marine ports and telecommunications companies.

### General Information

- **Symbol/Listing**: UTF/NYSE
- **CUSIP**: 19248A109
- **NAV per Share**: $25.71
- **Managed Assets**: $3.0 Billion
- **Market Price**: $24.52
- **52-Week Market Price Range**: $18.78–$24.52
- **Inception Date**: March 30, 2004
- **Number of Holdings**: 203
- **Discount to NAV**: -4.63%
- **Distribution Rate**: 7.59%
- **SEC Yield (30 Days ending 03/31/2019)**: 1.72%
- **Monthly Distribution Rate**: $0.1550
- **Common/Preferred & Fixed Income**: 85%/15%
- **Leverage**
  - % Variable Rate: 15.0%
  - % Fixed Rate: 85.0%

(1) Fund’s net assets plus principal amounts from leverage.
(2) Based on closing prices.
(3) Distribution rate is based on the current annualized distribution rate divided by the market price on the last business day of the quarter.
(4) The SEC yield is calculated by dividing annualized net investment income per share during a 30-day period by the maximum offering price per share as of the close of that period. SEC yield reflects the rate at which the fund is earning income on its current portfolio of securities. Since certain distributions received by the funds from real estate investment trusts (REITs) and master limited partnerships (MLPs) may consist of dividend income, return of capital and capital gains, and the character of these distributions cannot be determined until after the end of the quarter, the SEC yield has been adjusted for the funds that invest significantly in REITs and MLFs based on estimates of return of capital and capital gains.
(5) Most recently declared monthly distribution. As portfolio and market conditions change, future distributions may also change. Distributions are subject to recharacterization for tax purposes after the end of the fiscal year. The Fund is currently paying distributions in excess of its net investment income, which may result in a return of capital. Absent this, the yield would have been lower. See reverse side for additional information.

(1) Inception Date: March 30, 2004
(2) Linked Index: Linked UTF Index is represented by 80% S&P 1500 Utilities Index / 20% ICE BofAML Fixed Rate Preferred Securities Index through 12/31/09, and by 80% UBS Global Infrastructure & Utilities 50/50 Index Net / 20% ICE BofAML Fixed Rate Preferred Index thereafter.

Data quoted represents past performance, which is no guarantee of future results. Performance returns stated net of fees. There is no guarantee that any historical trend illustrated in this report will be repeated in the future, and there is no way to predict when such a trend will begin. There is no guarantee that any market forecast in this report will be realized. Current performance may be lower or higher than the performance quoted. The investment return and the principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Periods greater than 12 months are annualized. Returns are historical and include change in share price and reinvestment of all distributions. Month-end performance information can be obtained by visiting our website at cohenandsteers.com. There is no guarantee that any investment objective will be achieved. An investor cannot invest directly in an index, and index performance does not reflect the deduction of fees, expenses or taxes.

Performance results reflect the effects of leverage, which can positively impact performance in an up market and negatively impact performance in a down market.

The investment manager waived a portion of its fees during certain periods shown above. Absent such waivers, NAV returns would have been lower.

cohenandsteers.com
Cohen & Steers is a global investment manager specializing in liquid real assets, including real estate securities, listed infrastructure, commodities and natural resource equities, as well as preferred securities and other income solutions. Founded in 1986, the firm is headquartered in New York City, with offices in London, Hong Kong and Tokyo.

Risks. Shares of many closed-end funds frequently trade at a discount from their net asset value. The funds are subject to stock market risk, which is the risk that stock prices overall will decline over short or long periods, adversely affecting the value of an investment in a fund.

Since the Fund concentrates its assets in global infrastructure securities the Fund will be more susceptible to adverse economic or regulatory occurrences affecting global infrastructure companies than an investment company that is not primarily invested in global infrastructure companies. Infrastructure issuers may be subject to regulation by various governmental authorities and may also be affected by governmental regulation of rates charged to customers, operational or other mishaps, tariffs and changes in tax laws, regulatory policies and accounting standards.

Special risks of investing in foreign securities include (i) currency fluctuations, (ii) lower liquidity, (iii) political and economic uncertainties, and (iv) differences in accounting standards. Some international securities may represent small- and medium-sized companies, which may be more susceptible to price volatility and less liquid than larger companies.

NOT FDIC INSURED • MAY LOSE VALUE • NO BANK GUARANTEE • NOT INSURED BY ANY GOVERNMENT AGENCY

IMPORTANT INFORMATION: The Fund may pay distributions in excess of its net investment company taxable income, and this excess would be a return of capital distributed from the Fund’s assets. The estimated composition of each distribution, including any return of capital, will be provided to shareholders of record and is also available at cohenandsteers.com. Please note that these estimates may change substantially by year-end due to portfolio activity and tax recharacterizations, and shareholders will be notified following year-end regarding the final composition of all distributions via Form 1099-DIV.

The S&P 500 Utility Index is an unmanaged market-capitalization-weighted index of companies for which the primary business involves the generation, transmission, and/or distribution of electricity and/or natural gas. The S&P 1500 Utilities Index is an unmanaged market-capitalization-weighted index of companies for which the primary business involves the generation, transmission, and/or distribution of electricity and/or natural gas. The UBS Global 50/50 Infrastructure & Utilities Index - Net tracks a 50% exposure to global developed market utilities sector and a 50% exposure to global developed market infrastructure sector. The index is free-float market-capitalization weighted and reconstituted annually with quarterly rebalances and is net of dividend withholding taxes. The ICE BofAML Fixed Rate Preferred Securities Index tracks the performance of fixed-rate US dollar-denominated preferred securities issued in the US domestic market. The FTSE Global Core Infrastructure 50/50 Net Tax Index is a market-capitalization-weighted index of worldwide infrastructure and infrastructure-related securities and is net of dividend withholding taxes. Constituent weights are adjusted semi-annually according to three broad industry sectors: 50% utilities, 30% transportation, and a 20% mix of other sectors, including pipelines, satellites, and telecommunication towers. The S&P 500 Index is an unmanaged index of 500 large-capitalization stocks that is frequently used as a general measure of U.S. stock market performance.

An investor cannot invest directly in an index, and index performance does not reflect the deduction of fees, expenses or taxes. Percentages may differ from data in the Fund’s financial statements due to the effect of fair value pricing of foreign securities. The fund implements fair value pricing when the daily change in a specific U.S. market index exceeds a predetermined percentage. In the event fair value pricing is implemented on the first day of the period, the fund’s return may diverge from the performance of its benchmark, which is not fair valued. This divergence is usually reduced on the day following the implementation of fair value pricing by the fund, as the value of the securities in the index that are held by the fund typically move closer to the fund’s fair valued price when the market reopens. This factsheet is provided for informational purposes and is not an offer to purchase or sell Fund shares.
