This is because the Fund primarily invests in real estate investment trusts (REITs) and similar companies. Distributions from REITs are attributed to various sources including net investment income, capital gains and return of capital. The estimate shown above is based on the prior year breakdown on the distributions from the REIT securities held by the Fund. The Fund generally will receive from these companies a final determination as to the source of distributions early next year.

Income as determined under federal income tax regulations differs from GAAP. As a result, distributions are subject to recharacterization for federal income tax purposes. The final tax treatment of all Fund distributions will be provided on Form 1099-DIV, which is mailed after the close of the calendar year.
